SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

Cal OES COASTAL REGION

- Nothing significant to report.

Cal OES INLAND REGION

- Nothing significant to report.

Cal OES SOUTHERN REGION

Telecommunications Systems Maintenance, Cal OES Southern Region

On 02/26/18, Cal OES Southern Region had pre-planned network maintenance at the base in Los Alamitos. As a result; all lines, data, phone, and internet will be inoperable through 02/27/18.

- Contractors, Cal OES Information Technology (IT), and Tactical Communication (T-Comm) have been advised and are addressing the issue.
- Alternate communications methods were tested and are in place should the Cal OES Southern Regional Emergency Operations Center (SREOC) activate.
- [Cellular service in the area is not affected.](#)
- The Cal OES Southern Duty Officer (SDO) and IT Duty Officer (ITDO) are monitoring and providing updates as they become available.

FIRE ACTIVITY

Cal OES Fire Preparedness Levels

National	Northern California	Southern California
Preparedness Level 1	Preparedness Level 1	Preparedness Level 2
	Multi-Agency Coordination System MACS Mode: 1	Multi-Agency Coordination System MACS Mode: 1

Please note: The National and Regional Preparedness Levels are maintained by the National Multi-Agency Coordination (MAC) Group and are separate from Cal OES activation levels.

- Nothing significant to report.

- None reported.

WEATHER OF CONCERN

Weather of Concern

- Heavy snow is expected for the later half of this week for a large portion of the North State and the North Coast.
 - Snow levels will be around 2,500-4,500 feet on 02/28/18 and drop to around 1,000 feet by early 03/02/18.
 - Snow accumulations will range from a few inches in the coastal mountains to more than three feet at the highest elevations in Trinity County with significant snow at many passes
- A cold storm system will bring 2"-6" of snow to portions of Southern California today.
 - Snow is expected to accumulate at pass levels and could reach as low as 1,700 feet in some areas.
 - Hazardous winter driving conditions are possible across the I-5 Corridor near the Grapevine, Highway 2 in the San Gabriels, Highways 14 and 138 in the Antelope Valley, and Highway 33 in Ventura County

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

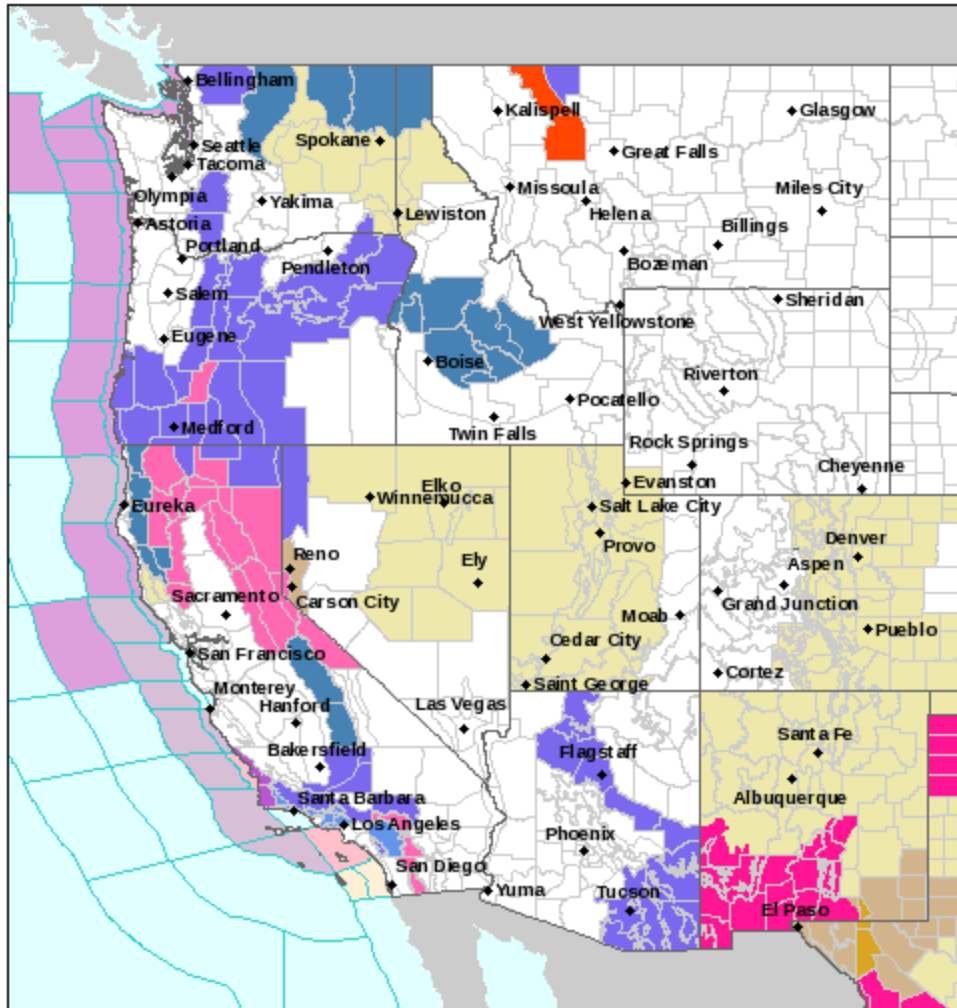

Today will be warmer than Monday with a lot of sunny conditions. The warmest areas will be in the lower 60s. Another, cold, wet weather system will arrive Wednesday and linger into the weekend. Fairly low snow levels are anticipated with this next system, around 2,000-3,000 feet in the north during the bulk of the precipitation and around 3,500-5,000 feet in the south. Snow levels are likely to remain fairly low Friday and Saturday as well with conditions over the weekend mostly gradually decreasing showers so that by Sunday just a few mountain showers are expected. Snow amounts will vary from a few inches at the lowest elevations to several feet in the higher mountain locations. Winter driving conditions can be expected to develop late Wednesday and last into Friday with snow on roads to lower elevations than happens most of the time during winter. There will also be a chance of a few thunderstorms later this week. Periods of gusty northerly winds will continue through this afternoon for many areas with peak gusts still mostly 25-35 mph, but they can be locally 40-50 in the most favored areas. After lighter winds tonight, moderately strong, gusty southerly winds will develop over the region Wednesday and decrease from the west Thursday with peak gusts mostly 25-40 mph but with 50-60 mph possible in the highest elevations.

SOUTHERN CALIFORNIA

An area of low pressure over Southern California will bring scattered showers with less than a quarter inch of additional rainfall. Showers will end from northwest to southeast throughout the day and the shower activity will end across the entire region this evening. The snow level will be around 3,000 feet. Temperatures will be 10 to 20 degrees below normal today, with upper 20s and 30s across the mountains and mid 40s to mid 50s in the valleys. There will be a break in the shower activity Wednesday in between storms. Showers will start across Central California once again Thursday morning and across Southern California Thursday night as a strong storm approaches the Pacific Northwest. Showers with this storm will continue through Saturday. Most locations will receive between a half inch and an inch of rainfall. However, the Big Sur Coast and the Central Sierra will receive 1 to 3 inches of rainfall. The snow level will be around 5,000 feet. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas Thursday afternoon through Saturday. Temperatures will be between 5 and 10 degrees below normal Wednesday through Saturday, with upper 30s and 40s across the mountains and 50s to low 60s in the valleys. A weak ridge of high pressure will bring a few degrees of warming each day and light winds to the region Sunday through early next week.
